

Juhis: Kiiruskaamerate .gpi faili lisamine Garmin autonavisse

Faili allalaadimine

Lae alla kiiruskaamerate .gpi fail (nt ee_speedcam.gpi)

Seadme ühendamine

Ühenda Garmin seade USB-kaabli abil arvutiga

Seadme avamine kettana

Oota, kuni seade avaneb kettana (näiteks GARMIN (E:))

Kausta avamine/loomine

Ava kaust Garmin/POI/. Kui POI kausta pole, loo see

Faili kopeerimine

Kopeeri ee_speedcam.gpi fail sellesse kausta

Seadme eemaldamine

Eemalda seade turvaliselt arvutist

Hoiatuste sisselülitamine

Lülita Garminis sisse Proximity Alerts → Speed Cameras (ON) (Settings → Proximity Alerts / Safety Cameras → ON)

Downloading the file

Download the speed camera .gpi file (e.g., ee_speedcam.gpi)

Connecting the device

Connect the Garmin device to the computer using a USB cable

Opening the device as a drive

Wait until the device appears as a drive (e.g., GARMIN (E:))

Opening/creating the folder

Open the folder Garmin/POI/. If the POI folder does not exist, create it

Copying the file

Copy the ee_speedcam.gpi file into this folder

Disconnecting the device

Safely remove the device from the computer

Enabling alerts

On the Garmin, enable Proximity Alerts → Speed Cameras (ON) (Settings → Proximity Alerts / Safety Cameras → ON)

Kui kasutad mitut faili (nt eri riikide kaamerad), võid need kõik kopeerida Garmin/POI/ kausta – seade loeb need eraldi sisse

If you are using multiple files (e.g., speed cameras for different countries), you can copy them all into the Garmin/POI/ folder – the device will load them separately

HOIATUS:

Esitatud kiiruskaamerate andmed on kogutud vabavaralistest ja avalikest allikatest Regio poolt. Kuigi anname oma parima, et andmed oleksid võimalikult ajakohased ja täpsed, ei pruugi need alati kajastada viimase hetke olukorda.

Regio ei vastuta andmete võimalike ebatäpsuste või kasutamisest tulenevate tagajärgede eest.

DISCLAIMER:

The provided speed camera data has been collected by Regio from freeware and public sources. While we do our best to ensure the information is as accurate and up to date as possible, it may not always reflect the latest situation.
